## Grove cranes

For almost a century, Grove has supplied equipment for the world's most important lifting projects.

With a range of mobile telescopic cranes from 8 t to 450 t capacity Grove has a lifiting solution for you.

Grove cranes are equipped with the latest technologies such as:

> MEGATRAK® suspension system

> TWIN-LOCK® boom pinning system

> MEGAFORM® boom design

> WADS working area definition system

> LMI load moment indicator

## Grove used cranes

By choosing Grove used, you buy a valuable used crane and a brand you can rely on.

A high quality, Grove used crane provides a long service life and the highest residual value on the market.

> Ready to Work - All used cranes are thoroughly checked by technicians before being released for sale.

> Available Warranty - An optional warranty program provides peace of mind; and all repairs use only genuine OEM parts.

> Expertise - Manufacturer certified experts control each part of the used crane sales process to ensure maximum customer satisfaction.

## When buying from the Grove used team...

...you buy directly from the manufacturer

## Why choose a Grove used crane?

> Reconditioned cranes provide shorter delivery times in most cases

> Lower cost than a new crane

> Can be retrofitted for specific country regulations

> Access to Grove training, services and OEM parts

> Crane customization to meet your specific requirements

## Services

When you buy a used Grove crane you buy Grove service too!

> Access to 24/7 Grove service support
